

CHARACTER

Lead Designer Kate @TeslaTechExplained

BACKGROUND

A brilliant designer with 850K Instagram followers (@TeslaTechExplained), Kate is a star in Zenith Wave theory. But her genius is haunted by a past failure. An energy source she designed catastrophically failed during a field test, leading to the disappearance of her mentor, Dr. Elias Vance. Wracked with guilt, she has left the lab and now obsessively seeks to understand the practical limits of the technology, hoping to find answers about the incident and ensure her work never hurts anyone again. Personal Quest: To recover the classified data logs from the failed field test that led to her mentor's disappearance, which are locked away by her employer, Zenith Wave. Key Contact: Lena, her missing mentor's daughter, who secretly provides Kate with cryptic clues her father left behind, believing he is still alive.
