

CHARACTER

Dr. Varn
@AncientTechOracle

BACKGROUND

Dr. Varn, the @AncientTechOracle to his 2.3M YouTube followers, wasn't always a fringe theorist. His obsession began as a child when he witnessed his father vanish during a strange celestial event that was officially denied. This trauma drove him from mainstream astrophysics to seek the truth in ancient technology and alien contact. He believes a similar event is coming and is desperately searching for a way to prevent it—or even reverse what happened. Personal Quest: To find a device capable of predicting the next celestial alignment, which he believes will trigger another "event" and give him a chance to find his father. Key Rival: Dr. Aris Thorne, a mainstream scientist who takes every opportunity to debunk his work and who may know more about the official cover-up than he lets on.

ABILITIES (choose 3)
