

CHARACTER

Field Technician Karl

BACKGROUND

Karl is a hands-on expert in Zenith Wave Technology, specializing in its practical application and field repairs. Unlike his more theoretical colleagues, Karl learned the tech through reverse-engineering salvaged pre-collapse devices found in remote ruins. He comes from a family of desert scavengers, not academics. He now works for the company commercializing the tech, often sent to remote or dangerous locations to install, maintain, or recover Zenith Wave units. He trusts his tools more than people.
