

CHARACTER

Field Technician Karl
@DesertTechGuru

BACKGROUND

With 1.2M TikTok followers, @DesertTechGuru's Karl is a master of Zenith Wave Technology. He's no academic; he learned his trade scavenging ruins. This path has scars: years ago, a salvaged device he was repairing malfunctioned, killing his younger brother, Leo. Now, he works for the company that commercializes the tech, sent to the most dangerous places to fix their devices. He's obsessed with practical, flawless repairs, trusting his tools because he knows firsthand the fatal cost of failure. Personal Quest: To find the schematics for the specific pre-collapse device that killed his brother, believing he can understand what went wrong and prevent it from happening again. Key Contact: A desert scavenger named "Ratchet," a tense, off-the-books contact who provides him with rare parts and information that Zenith Wave doesn't know about.
